BISE LED 36W, hermetic linear luminaire, 3250lm, IP65, 4000K

Hermetic linear luminaires are an ideal solution to replace traditional fluorescent tubes. They can be used to illuminate the interior and exterior parts of rooms with increased dust and humidity, such as parking lots (underground or multi-storey), garages, sports stadiums, warehouses, underground passages, factories, workshops, etc. The luminaire uses SMD LED diodes, which guarantee high energy efficiency and have a long service life, as they shine up to 30,000 hours. The presented hermetic lamp works with a power of 36W and emits light with the luminous flux of 3250 lm. It shines with a natural white color at a temperature of 4000K. The degree of ingress protection IP65 guarantees excellent protection against dust and water, therefore this linear luminaire will easily withstand any weather and harsh working conditions in workshops and factories. The luminaire is made of unbreakable polycarbonate (PC). The shade is milky in color.

Rated power:
36W

Degree of protection (IP):
65

Luminous flux:
3250lm

Colour temperature:
4000K

Installation:
surface mounting

General information

Rated power: 36 W

Degree of protection (IP): 65

Colour: white

Luminous flux: 3250 lm

Colour temperature: 4000K

Dimensions - width: 1282 mm

Installation: surface mounting

Dimensions - height: 42.5 mm

Dimensions - depth: 30 mm
